2. Customer-focus

1. Customer success
2. Product management
3. Modern marketing (M3)

Customer success is becoming a growth engine that extends beyond software-as-a-service (SaaS) businesses.

Customer success 1.0

Focused on churn reduction and risk management

Emerged from SaaS companies focused on complex business applications

Customer success 2.0

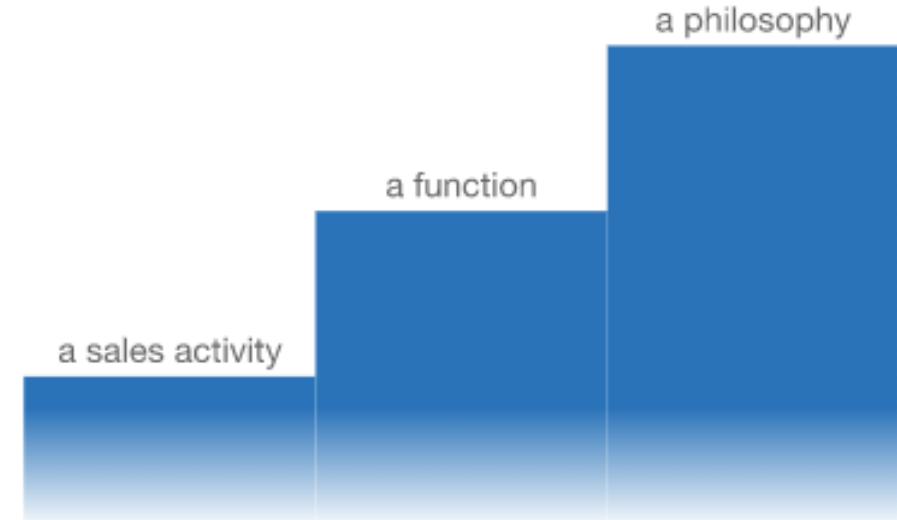

Recognizes customer success can be a growth engine

Used by companies across a range of B2B sectors to change the approach to customer-life-cycle management

McKinsey&Company

Customer success is evolving from a sales activity to a philosophy.

Customer success as ...

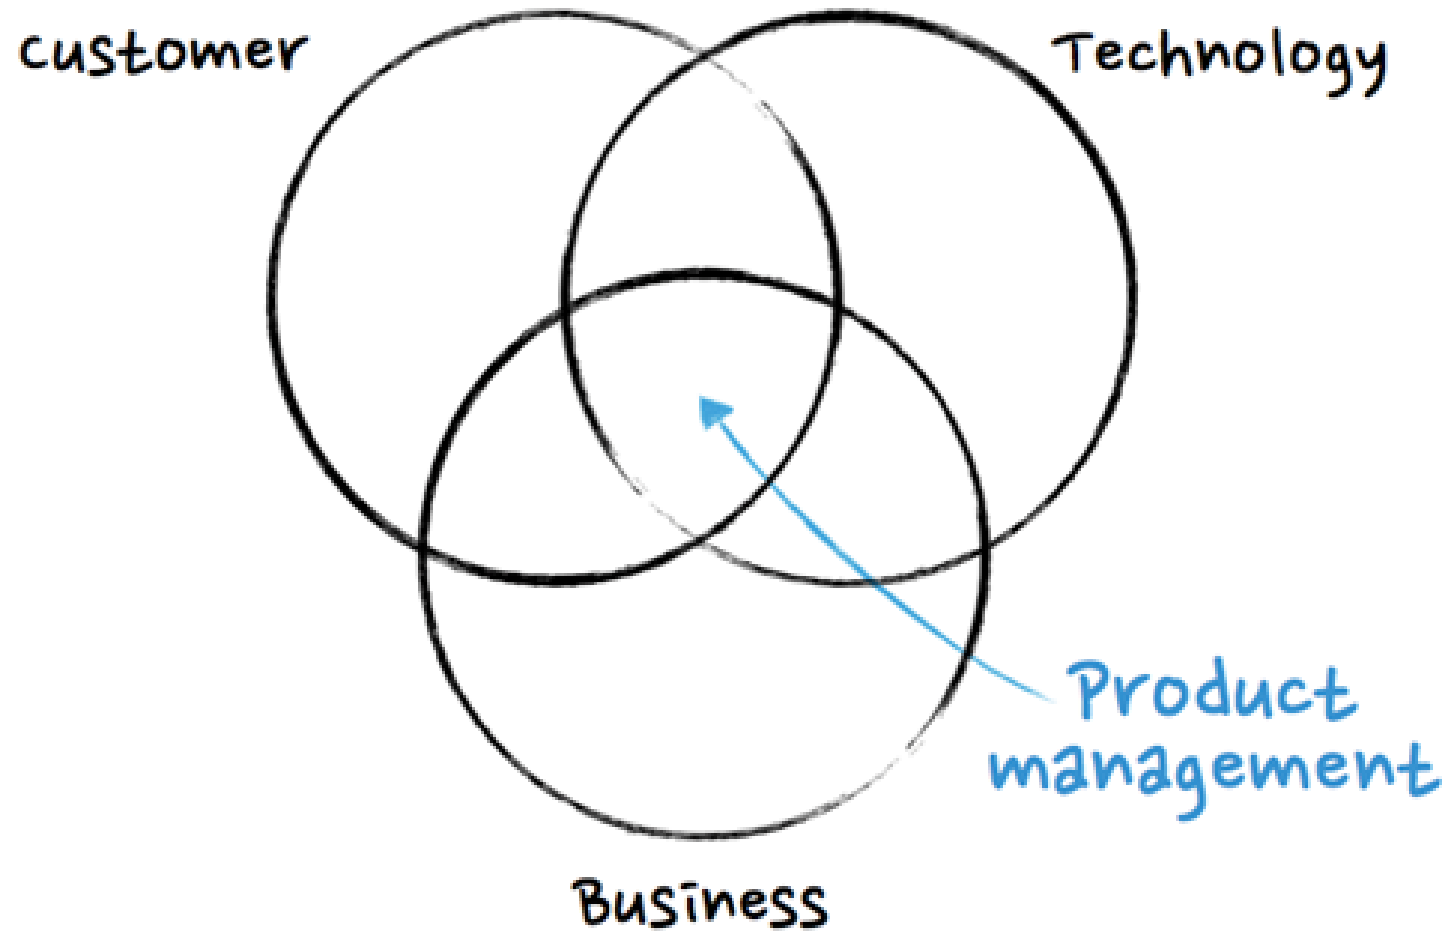

- The bar is rising for the B2B customer experience
- Customer success can be the catalyst that increases the focus on customer experience
